CLEAR MATTE & SUPER GLOSS FILM

- * Ultra fine printing quality, high density & high transparency
- * Long outdoor durability (3 -5 years)
- * Can also be used for interior illuminated lighting system
- * Available in both adhesive coated and uncoated

Like other kinds of HDTE printing media, the printing images can be digitally processed via computer, which makes designing and printing size easy and versatile.

Clear Film allows the application of translucent images onto the background of your choosing, making it a great application for retail windows, as well as over top of substrates containing a graphic component.

This substrate has great high-density and permeability, with excellent resistant properties against water and harmful UV rays that are unavailable to conventional inkjet printing media. Either media with the adhesive coatings on the surface or reverse assures great weather resistance.

Due to good permeability of the dye sublimation type dyestuff, pure and clear printing quality can be obtained.

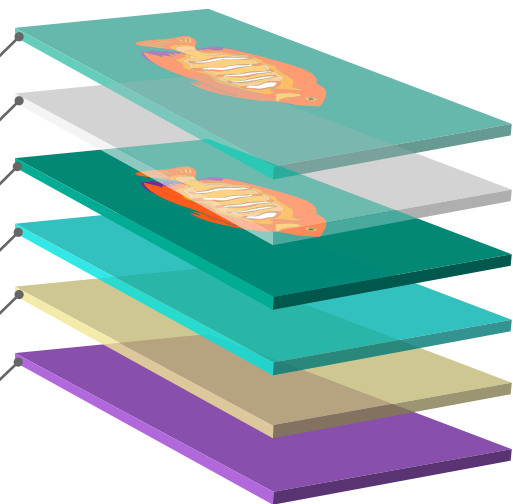

Printed Transfer Paper
Transparent Fluoride Layer
Image Forming Layer
Transparent Base Film Layer
Transparent Adhesive Layer
Release Liner

EXAMPLE OF MEDIA

RECOMMENDED APPLICATIONS

Show window display, Graphic printing for store interior decoration, Interior illuminated lighting system, Outdoor illuminated billboards/guide signs/bulletin boards, etc.
