## CONFORMABLE FILM

- \*Elastic and conforms to curved surfaces
- \* Ultra fine printing quality with high density
- \* Long outdoor durability (3 -5 years)
- \* Easy application (pre-coated adhesive)

Like other kinds of HDTE printing media, the printing images can be digitally processed via computer, which makes designing and printing size easy and versatile.

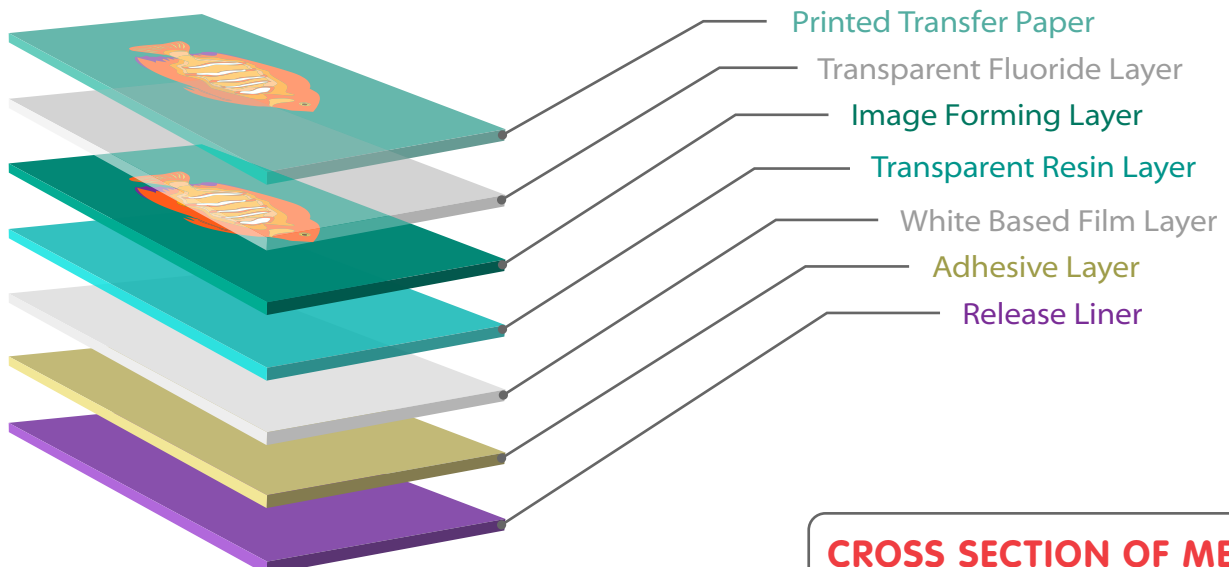

In addition to ultra fine printing properties, and long outdoor durability, which is indicative of all of the HDTE series printing substrates, **Conformable Film** possesses the additional property of elasticity. The property enables the substrate to be used to wrap automobiles, including buses and free marking, applications which require their substrate to be able to conform to the various curved surfaces. When it comes to store displays, having curved or corrugated surfaces and corners is also made possible.

EXAMPLE OF MEDIA

## RECOMMENDED APPLICATIONS

Wrapping automobiles for advertisement purposes, Decoration of trucks on side wall, Guide sign boards / bulletin boards, Outdoor & Indoor billboards, and virtually anything else with a non-flat surface.
