METALLIC CHROME FOIL

- * Metallic feeling like genuine metals
- * Ultra fine printing quality, which is equivalent to silver halide prints
- * Long outdoor durability (3 -5 years)
- * overlay lamination after printing is not required

Like other kinds of HDTE printing media, the printing images can be digitally processed via computer, which makes designing and printing size easy and versatile.

With the assistance of heat, dye sublimation type dyestuff goes through the top fluoride resin layer and fixes in the image forming layer. The media exhibits the feeling of genuine metal.

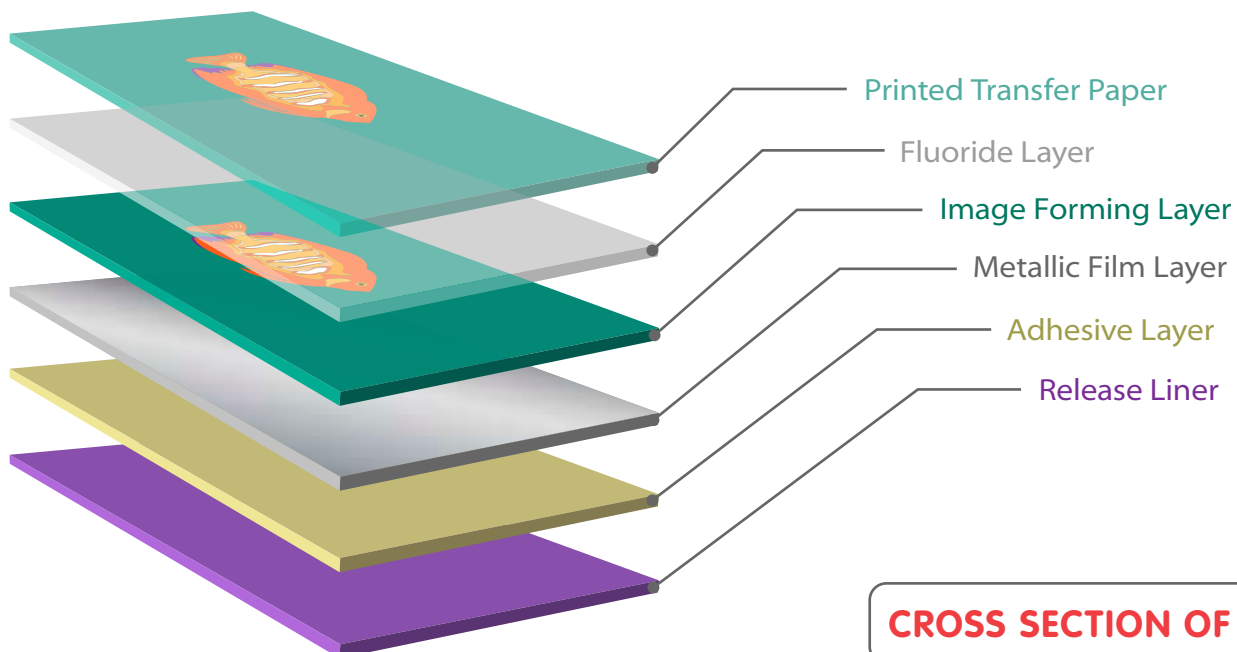

The media also exhibits high resistance to sun, water, chemicals, contamination and scratching, which cannot be achieved by any other similar media.

EXAMPLE OF MEDIA

RECOMMENDED APPLICATIONS

Illuminated signboards for both indoor and outdoor use, Interior decoration, Window display, Restaurant menu panels, Outdoor billboards, Guide signboards, Bulletin boards, etc.
