

**PhotoTrak™** is the perfect display print hanging system for large unmounted prints. It is designed to display either one print for single-sided viewing or two prints back-to-back for double-sided viewing. The modern design is a faceted trak that looks elegant and simple. The weight of the aluminum gives it a look of substantial quality. It has molded black end caps for the finishing touch.

## PhotoTrak™ Hanging Options

## Description

**PhotoTrak™** is a unique display print hanging system, designed to lower the cost of displaying large prints by eliminating the high cost of mounting.

Phototrak™ also minimizes your shipping costs because large displays can be rolled up and shipped in a tube instead of crating and shipping large mounted prints. Phototrak™ easily displays prints of almost any size. Its design versatility enables you to display one print for single-sided viewing or two prints back-to-back for double-sided viewing. It is available in black or silver color anodized aluminum. For smaller prints, a lighter weight black plastic Phototrak™ is available. Phototrak™ has a variety of hanging hardware options, making it adaptable to any display setting.

Phototrak™ is an original design, trademarked and patented by Exhibit Images/Color 2000.
