## WHITE SUPER GLOSS & MATTE

- \* Ultra fine printing quality with high density
- \* Long outdoor durability (3 -5 years)
- \* Overlay lamination after printing is not required
- \* Easy application (pre-coated adhesive)

Like other kinds of HDTE printing media, the printing images can be digitally processed via computer, which makes designing and printing size easy and versatile.

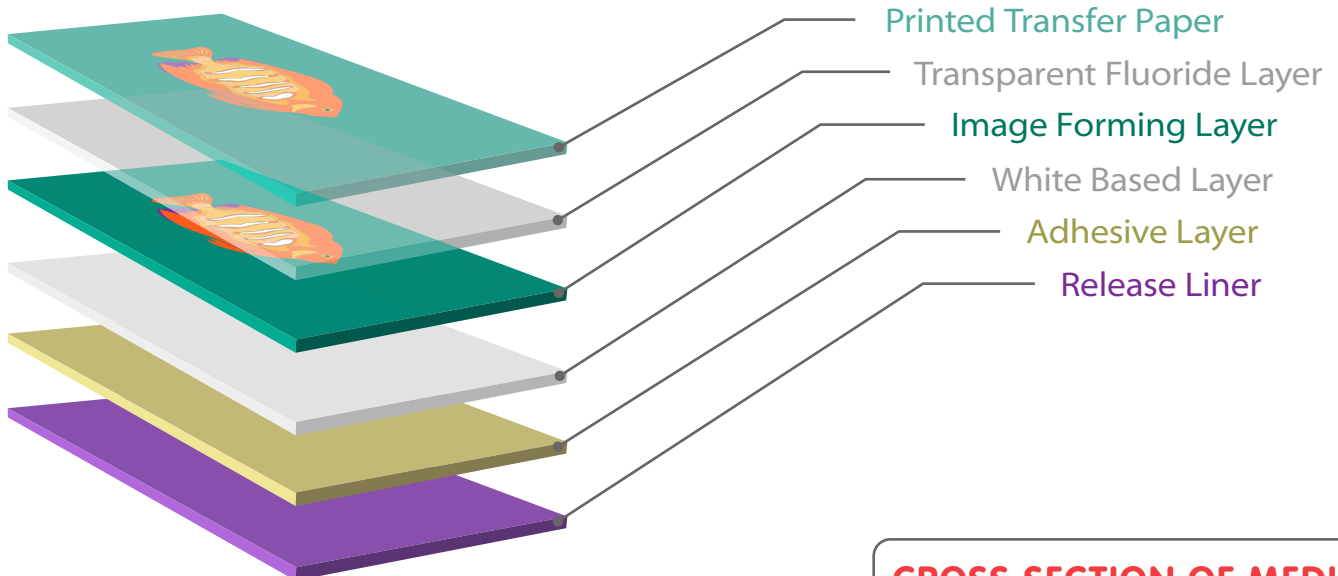

With the assistance of heat, dye sublimation type dyestuff goes through the top fluoride resin layer and fixes in the image forming layer. This enhances such properties as resistance to harmful UV rays, wather, chemicals, contamination and scratching. With the HDTE process, vibrant high-density printing becomes possible, creating richer and more vibrant prints than are possible with conventional inkjet prints.

**EXAMPLE OF MEDIA**

## RECOMMENDED APPLICATIONS

Indoor and outdoor billboards, Guide sign boards, Interior decoration, Display, Restaurant menu panels, White boards, Door plates, etc.
